SUMMARY

B.Tech Information Technology student at NIT Kurukshetra with strong foundations in Data Structures and Algorithms, DBMS, Operating Systems, OOPS, and Computer Networks. Solved 500+ coding problems across various platforms, with a LeetCode contest rating of 1555(maximum). Passionate about building machine learning and AI-powered applications, having developed projects like a face recognition photo sorter and a RAG based PDF assistant. Developed strong communication and teamwork skills through active contributions to Technobyte, NIT KKR's technical and management society.

EDUCATION

Degree	Institute	Board / University	CGPA/Percentage	Year
B.Tech IT	National Institute of Technology, Kurukshetra	NIT Kurukshetra	8.6520 (Till 3rd sym)	2024-2028
Senior Secondary	Govt. Model Sr. Sec. School	CBSE	91.6%	2023
Matriculation	National Public School	CBSE	91.8%	2021

PROJECTS

- **FaceSorter – AI-powered Face Recognition & Photo Sorting Tool** Jan 2026
React, CSS, FastAPI, DeepFace, FaceNet512, Scikit-learn, MTCNN, RetinaFace **GitHub**
 - Built a full-stack AI-powered face recognition platform using React and FastAPI that detects, matches, and automatically sorts uploaded images based on a target face
 - Designed a hybrid recognition pipeline combining an SVM classifier with cosine similarity over FaceNet512 embeddings, enabling accurate matching for both known and unknown identities
 - Integrated MTCNN and RetinaFace detectors with configurable similarity thresholds and generated downloadable ZIP archives containing matched and non-matched images
- **AI PDF Assistant – RAG-based Document Q&A Tool** Jul 2026
Python, LangChain, Vector Embeddings, Retrieval-Augmented Generation(RAG) **GitHub**
 - Developed a Retrieval-Augmented Generation (RAG) pipeline using LangChain that lets users upload a PDF and interactively query its contents in natural language
 - Implemented document chunking and embedding-based retrieval to ground responses in the uploaded document, reducing hallucination
 - Built an auto-summarization feature to generate summary directly from uploaded PDFs, deployed as a live web app

TECHNICAL SKILLS

- **Programming Languages:** C++, Python, JavaScript
- **Web Technologies:** HTML, CSS
- **Databases:** MySQL
- **Tools and Frameworks:** GitHub, VS Code, PyTorch, scikit-learn, LangChain
- **Operating Systems:** Linux, Windows

KEY COURSES TAKEN

- **Computer Science:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN), Digital System Design

POSITIONS OF RESPONSIBILITY

- **Member of Media Team,** Technobyte (Technical & Management Society)

ACHIEVEMENTS

- **JEE Mains,** Secured 99.33 percentile
- **Competitive Programming,** Solved 500+ DSA problems across LeetCode, Codeforces and Codechef
- **LeetCode,** Contest rating: 1555(maximum)
